## Summary

I am a Software Engineer with around a year of experience in software development and Quality Assurance, with a strong understanding of software systems and development practices. I have experience applying QA principles, optimization, software testing, and test automation to help ensure reliable and high-quality applications. I have strong problem-solving skills, a good understanding of the software development lifecycle, and a focus on identifying issues and improving product quality. I am looking to leverage my software development and QA experience in an SDET role focused on test automation and quality engineering.

## Employment History

**Software Enginner,** *SoniSoft (Contract)* 04/2026 – Present
Biratnagar

- Deep dived into the business workflow and translated into end-to-end software solutions, taking ownership across development, testing and delivery of the software.
- Integrated QA and testing throughout the development, identifying and resolving issues early to support deliver ahead of deadlines .
- Optimized and scaled backend systems through database optimization, pagination, performance tuning, and deployment configuration.
- Reduced post-deployment bugs, issue reports, system latency ,and deployment delays by 40% through proactive testing and system optmization.
- Coordinated with team and clients maintaining end-to-end documentation

**Junior software Developer,** *Click Digitals* 03/2025 – 02/2026
Biratnagar

- Developed and maintained scalable backend systems and RESTful APIs, with a strong focus on system quality, reliability and performance.
- Focused on system optimization, quality assurance, deployment and troubleshooting, identifying issues early and improving overall system stability and performance.
- Translated business requirements into reliable software solutions, contributing in every phases from production, testing and deployment.
- Worked closely with team, learned team collaboration, dived into more depth in framework knowledge and deployment.

**Software Developer Intern,** *Brandwave* 07/2024 – 02/2025
Biratnagar

- Assisted senior developers with software development tasks, contributing to real-world projects and gaining practical development experience.
- Learned and applied the software development lifecycle, from requirements and development to testing and deployment.
- Gained practical exposure to software testing methodologies, debugging, clean code writing and quality-focus development practices.
- worked on GitHub and version control, following collaborative development and code management practices.

## Education

**BSc CSIT,** *Birat Multiple College* 11/2023 – Present
Biratnagar, Koshi

## Skills

- Playwright
- Cypress
- jenkins
- Django
- PostgreSQL
- Docker
- postman
- Manual Testing
- Typescript
- Python
- MySQL
- Javascript
- github actions
- React
- Jira
- Agile Scrum

## Projects

**OrangeHRM Enterprise Platform Verification** 10/2026 – Present

- I owned the entire QA lifecycle for the OrangeHRM (open-source) platform by authoring the Test Plan, mapping 100+ scenarios, drafting 300+ test cases, and successfully documenting multiple critical, high-severity defects in Jira under supervision of mentor.
- Built a robust automation testing framework using Playwright and Typescript to script core end-to-end user workflows and accelerate regression testing.

**Bazar IO** , *ecommerce site* 07/2026 – 10/2026

- Its a multi-vendor e-commerce platform where user can buy and sell products, featuring payment integration, google login, category-based filtering and dynamic product variants with configurable pricing and quantities.
- I contributed to AI-assisted development ,database optimization, paging, system workflow and docker--based deployment ,while focusing on system quality, validation and testing to ensure smooth application performance.

**Crossdeal Nepal** , *ecommerce portal* 04/2026 – 07/2026

- Its a cross-border ecommerce platform that enables users to order international products through URLs and descriptions , with a secure admin dashboard for managing orders, delivery, and payment status.
- I contributed to the development, database optimization, pagination and deployment of the platform, while performing the validation and verification to ensure system quality.
