D.O.B: 07/26/2005

Gender: Male

Marital Status: Single

Nationality: Nepal

SUMMARY

I am a Detail-oriented software developer with two years of experience in software development and a solid foundation in machine learning projects. I have Proficiency in designing, implementing, and optimizing algorithms to solve complex problems. I also have knowledge about integrating third party APIs, LLM and Project Deployment. Along with that I have strong analytical and data-driven decision making skills with a solid foundation of Data Science. I am eager to learn new skills, upgrade myself and gain experience in the field of tech.

EMPLOYMENT HISTORY

Full Stack Developer – SoniSoft (Contract) Jan 2026 – Till Date
Biratnagar, Koshi

I have worked as a Full Stack Developer to develop and maintain end to end systems. Where I have entirely worked to gather the client's requirements, build responsive frontend, create scalable backend services, optimize the database, carryout the testing procedure and deploy it. During which I have gained an impactful experience in all the sectors of software development.

Backend Developer -- Click Digitals Feb 2025 – Dec 2025
Biratnagar, Koshi

I have worked as a Backend Developer to develop and maintain scalable backend systems, design RESTful APIs, optimize performance and deploy the systems to ensure end to end delivery of the software. I have also coordinated with the frontend team to help them in the frontend development, integration and design process.

Software Developer Intern -- Brandwave July 2024 – Dec 2025
Biratnagar, Koshi

I have worked as a Software developer intern to assist the development process, learn the software development fundaments and worked on real life project which gained me confidence to progress more in the field of software development.

EDUCATION

Birat Multiple College - Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

Biratnagar, Koshi. November 2023 - Till Date

ACCOMPLISHMENTS

- I have created and deployed a URL based e-commerce portal with admin setup and dashboard where user can place order via URL link with status and price tracking.
- I have created a full-featured e-commerce platform with seller accounts, dynamic variant-based pricing, a sales dashboard, and everything needed for smooth buying and selling.
- I have created and deployed end to end full stack applications like office management systems, Forest Management Systems, Real Estate websites and Portfolio Websites.
- I have built a chat bot using Ollama that runs locally and generates intelligent, context-aware responses using open-source LLMs. It processes user queries efficiently without relying on external APIs, ensuring privacy and fast performance.
- I have created many prediction systems like Dish Prediction System, Second Hand Car Price Prediction system, Movie Recommendation System to strengthen the concept of machine learning.

SKILLS

Python

Django

MySQL

Docker

Numpy

PostgreSQL

FastAPI

Scikit-Learn

React

AWS

Langchain
